### CIRCULAR SHAWLS

**This is a project based class similar to the triangular shawls, however we'll be applying different techniques to a circular shawl project. We will look at different ways of casting on, shawl construction - different shapes and sizes, and we will follow a chart. I will also show you how to read your knitting (in relation to following charts and correcting mistakes), and how to change the pattern. Please bring 3.5mm DPNS and a 3.5mm circular needle for the project - length would ideally be 40cm and a bigger size for later - e.g. 80cm. Yarn is 4ply and will be provided.**
